

Natural Advanced Facilities - Overview

This documentation contains detailed information which you will find necessary when you want to spool the output of your Natural programs and route it to specific physical printers. It applies to all platforms and TP monitors with which Natural Advanced Facilities can be used: CICS, IMS/DC and BS2000/OSD. As a rule, the screens in this documentation apply to the CICS version.

In the remainder of this documentation Natural Advanced Facilities is also referred to as NAF.

 Introduction	Gives a general overview of Natural Advanced Facilities and explains the basic terminology. It also tells you how to start NATSPOOL and how to invoke a NATSPOOL function.
 Administration	Describes the functions of the Administration section of the NATSPOOL menu.
